

OFFENDER MANAGEMENT SYSTEM

OMNET® redefines inmate management for the modern era. Built as a secure, AI-powered SaaS solution, it empowers correctional facilities to operate with unparalleled efficiency, accuracy, and foresight. From the moment of booking to final release, OMNET® delivers real-time insights, ironclad security, and intelligent automation — giving leadership teams the tools to make faster, smarter, and safer decisions.

PROVEN ROI

- 60% Reduction in manual data entry and paperwork.
- 40% Improvement in incident response times with real-time alerts.

OMNET®

KEY ADVANTAGES FOR DECISION MAKERS

FACILITY ADMINISTRATORS

Streamlined operations,
reduced costs,
compliance-ready
workflows.

CIOs

Cloud-based, API-ready,
robust security with MFA
and encryption.

COMMISSIONERS & PROCUREMENT

Transparent ROI, proven
implementation success,
long-term vendor
partnership.

Revolutionizing Correctional Management with Intelligent, Secure Solutions

OMNET® is an intelligent, secure correctional management platform that centralizes inmate lifecycle tracking, incidents, grievances, housing, and casework—enhanced by AI-driven analytics and predictive insights. With strong security, role-based controls, full auditability, and seamless compliance, OMNET® helps facilities operate with greater safety, efficiency, and clarity.

What We Offer

- Comprehensive Operations Management
- Enhanced Safety & Security
- Data-Driven Intelligence (AI-Powered)
- Robust Compliance & Trust
- Streamlined Efficiency

Advanced Security & Identification

- **Fingerprint Integration:** Seamless integration with fingerprinting systems for verified identification.
- **Mugshot Search:** Quick and accurate mugshot search capabilities for identification verification.
- **Security Threat Group (STG) Management:** Robust tools for identifying and tracking gang affiliations.
- **AI Integration:** Leverage cutting-edge AI for predictive analysis, risk assessment, and operational insights.

End to End Inmate Management

- **Booking & Intake:** Seamlessly manage the inmate entry process, from initial booking to complete demographic capture.
- **Comprehensive Inmate Profiles:** Detailed records including Demographics, Aliases, Addresses, Property Tracking and unique identifiers
- **Case Management:** Comprehensive caseload management, Officer Assignment and Case tracking functions.
- **Classification:** An integrated module to assess individuals and recommend programs, treatments, or security measures based on their needs.
- **Housing & Movement:** Efficiently track all inmate movements and manage housing assignments across facilities.
- **Sentence Calculation:** Accurately and automatically compute sentences, ensuring legal compliance and clarity.
- **Incident Reporting:** Real-time, detailed incident capture for timely response and analysis.
- **Disciplinary Tracking:** Manage all disciplinary actions, hearings, and outcomes systematically.
- **Grievance Management:** Streamline the inmate grievance process.
- **Programs & Treatments:** Track inmate participation and progress in rehabilitation programs, education, and medical treatments.

The Best Correctional Management Solution

Powerful Data-driven Insights

- **On-Demand Reporting:** Generate instant, customizable reports for operational oversight and strategic planning.
- **AI-Powered Analytics:** Transform raw data into actionable intelligence, revealing patterns, predicting outcomes, and optimizing resource allocation.
- **Interactive Data Visualization:** Generate dynamic charts and maps (e.g., facility population, incident hotspots) for intuitive analysis

Uncompromising Security & Compliance

- **Multi-Factor Authentication (MFA):** Enhance security with robust user verification.
- **Role-Based Access Control (RBAC):** Granular control over data access, ensuring "need-to-know" principles.
- **Comprehensive Audit Trails:** Full traceability of all system actions for accountability and transparency.
- **CJIS Compliance:** Built to meet stringent Criminal Justice Information Services (CJIS) security policy standards.
- **HIPAA Preparedness:** Protocols and features to manage Protected Health Information (PHI) securely.
- **Web Services:** Standard Secure Web Services API for data exchange.

CORE FUNCTIONALITIES

- OMNET® uses AI to automatically generate concise summaries of offender records and activities, enabling staff to quickly review case history, key actions, and updates.
- Booking & Intake (with mugshot & fingerprint capture)
- Case Management
- Housing & Movement Tracking
- Grievance Management
- Incident Reporting & Disciplinary Tracking
- Leadership Dashboards & Reporting
- User / Profile Administration
- User Notifications
- Screen setup / Configuration
- OMNET® integrates with RFID to verify offender locations, track movement between zones, and support routine counts, controlled movement, and security monitoring.

Futuristic SaaS Design

- No on-premise hardware required.
- Updates, backups, and patches delivered automatically.
- Rapid deployment: Go live in months, not years.

AI-Powered Integration

- Predictive analytics for incident prevention.
- Smart recommendations for inmate housing and case prioritization.
- Automated reporting to meet compliance standards.

Security You Can Trust

- End-to-end encryption for all inmate records.
- Full audit trail for every action.
- Strict role-based access for staff.

Integration Ready

- ✓ Seamless connection with court, probation, and law enforcement systems.
- ✓ Flexible APIs for custom integrations.
